PATTERN

Print Graph

(ODD numbered rows follow graph right to left, EVEN numbered rows follow graph left to right)

Chain 26 with Ecu.

ROW 1: Reading the graph right to left, begin working HHDC in the second chain from the hook. Work 1 HHDC in each chain across the row. (25)

(Tip: each box on the graph is equal to one Herringbone HDC stitch.)

ROW 2: Reading the graph from left to right, work the first 5 sts in Ecu, pull Tangerine through on the last step of the stitch, drop Ecu, HHDC the next 15 sts in Tangerine, drop Tangerine, pull through with Ecu and work remaining 5 sts. Ch 1 and turn.

Tip: This is what the back of your hot pad will look like. Keep all the ends to one side of your work so they are hidden on the inside of your hot pad.

ROWS 3-21: Continue following the graph changing colors when indicated, always CH 1 and turn at the end of each row. Tie off. (I didn't weave in any ends, just tucked them to the back of the hot pad.)

Make a second side with ECRU.

JOIN the two sides together by pulling up a loop in any corner CH 1 and SC into same sp. Work 1 SC into each stitch of both sides, 3 SC into each corner and 1 SC per end of each row on the sides. Make sure the ends are tucked into the middle of the hot pad. at the end of the round, pull through with Tangerine.

(Tip: You essentially are sewing the two panels together with SC.)

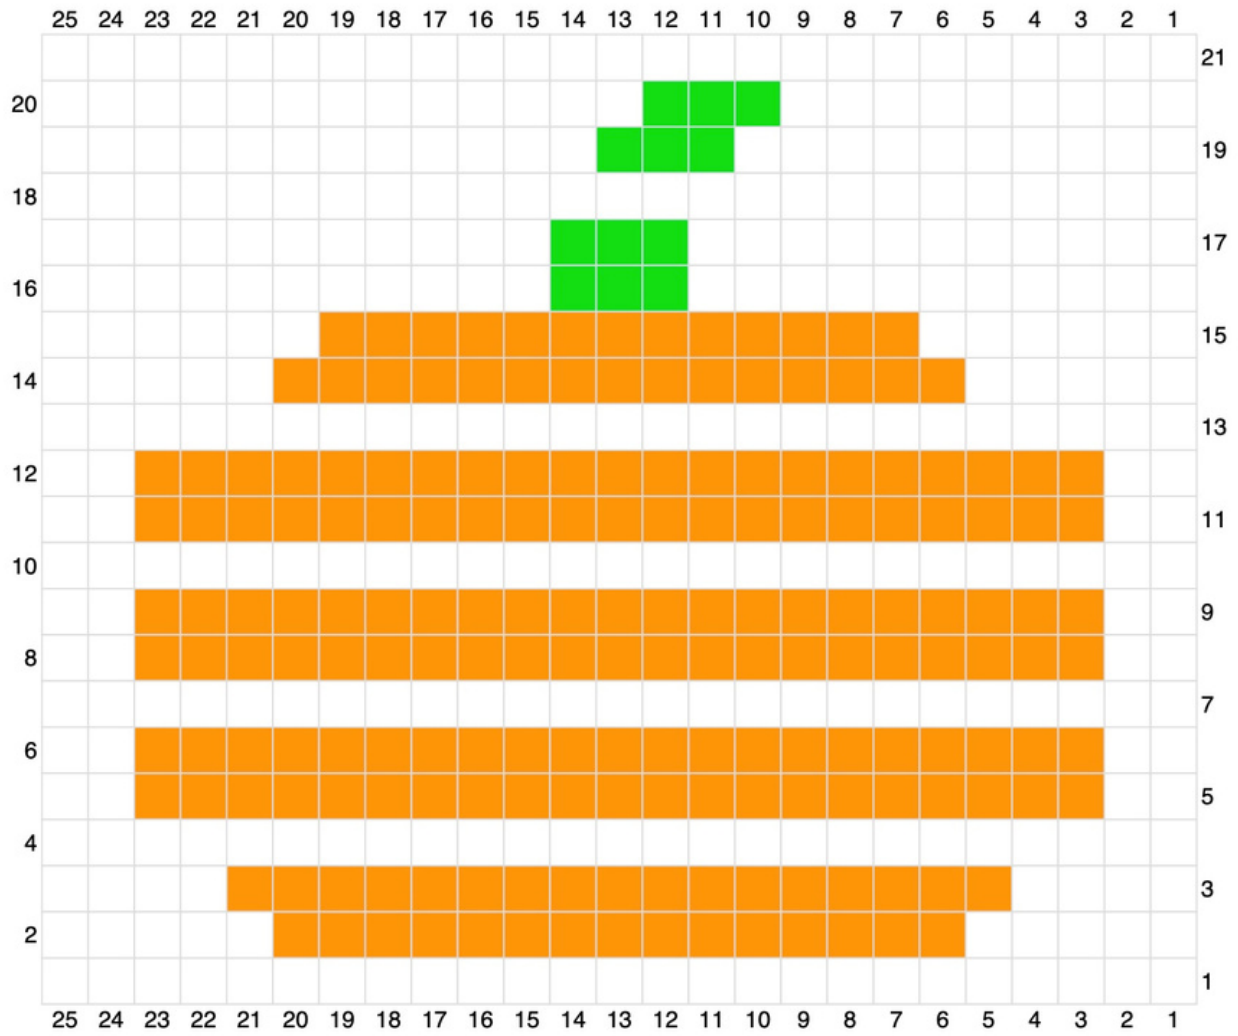

BORDER: With Tangerine, CH 2.

In the first chain, make a cluster by *yarning over and inserting your hook, yarn over and pull up a loop.

Repeat from * 3 more times. Yarn over and pull through all loops on your hook. Slip stitch into the stitch just below the chain 2 to secure the puff. Slip stitch into each of the next 4 sts.

Repeat from ** around. Join with a slip stitch to the first st, tie off and weave in all ends.
